SUMMARY

Unity Developer experienced in XR projects for Indian Defence Training. Proficient in Unity, AI integration, and cross-platform development, with a focus on building immersive, real-world applications.

EXPERIENCE

Unity Developer - Volga Infosys Private Limited

Ludhiana, Punjab

03/2026 – Present

Tasks

- Collaborated on XR-based training solutions under **Indian defense**-oriented projects, leveraging Unity and immersive technologies.
- Developed interactive 3D models using Unity for client projects.
- Collaborated with designers to implement game features and mechanics.

PROJECTS

VR Training Simulation for Indian Defense | Unity VR + Networking |

Ongoing

- Developed a VR-based aircraft simulation with dual radar systems (client-server architecture).
- Engineered a UDP-based real-time communication pipeline for multi-device synchronization over LAN.
- Transmitting and visualizing live data including aircraft coordinates, distance metrics, and positional tracking.
- Solved low-latency synchronization challenges to maintain real-time interaction.

EngineeringVR | Engine Visualization Platform for IIT | Apr 2025 – Present

- VR-based engine training and visualization platform for interactive learning of complex engine systems.
- Features: X-Ray View, Separated View, DIY Assembly, and Working Simulation modes.
- Built automation tools for engine integration, reducing setup time from hours to seconds.
- Smart AI-powered Tool using GroqAPI and LLMs to generate engine part names, descriptions etc.
- Optimized workflows, reducing complete engine configuration time from ~3 hours to ~3 minutes.

RealityDropAR | Augmented Reality Application | Jan 2025 – Present

- AR app to place and visualize any 3D objects in real-world environments using Unity.
- Implemented object interaction toolkit (scale, rotate, anchor), reducing user setup time by ~60%.

TryMyFurniture | AR Furniture Try-On App | Jan 2026

- Built a mobile AR application using Unity AR Foundation for real-time furniture placement.
- Implemented plane detection, surface tracking, and accurate scaling for realistic visualization.

Space Quest | 2D Game Development | Nov 2024

- Developed a space-themed 2D game with custom mechanics using Unity.
- Implemented particle systems, scoring logic, and interactive UI.
- Designed progressive difficulty to enhance gameplay engagement.

AR Learning Comparison System | Research Project | Jul 2025 – Aug 2025

- Application integrating both Marker-based and Marker-less AR techniques.
- Conducted comparative analysis using real-time performance metrics.

EDUCATION

Master of Computer Applications

Vellore Institute of Technology, Vellore

07/2024 - Present

Bachelor of Computer Applications

Darrang College, Tezpur

08/2020 - 09/2023

Higher Secondary (Science)

Concept Junior College, Nagaon

09/2018 - 08/2020

Class 10

Green Dale School, Rangapara

04/2017 - 05/2018

CERTIFICATIONS

Introduction to Augmented Reality and ARCore

(08/2025 - 09/2025)

Google

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional (10/2025 - 10/2025)

Oracle University

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate (10/2025 - 10/2025)

Oracle University

LANGUAGES

- Hindi
- English
- Bengali
- Assamese

SKILLS

- Unity Engine
- Multiplayer networking
- AI integration
- Game development
- Cross-platform development
- XR Development

INTERESTS

AgenticAI & Autonomous Systems

AI/ML

Augmented / Mixed Reality

Spatial Computing & Interactive 3D Interfaces

Mobile App Development
